College Req-year degree sition of a liberal arts degree

Understanding the values of civic and social citizenship Appreciating disciplinary integration Applying learning in a range of domains

Reasoning scientifically

Deducing relationship (qualitatively or quantitatively) between cause and effect and the relative importance of multiple causes, basing conclusions on firm evidence rather than dogma, building and testing models of (small parts of) the reality surrounding us, is the systematic way of analyzing any situation within and outside of the natural sciences. It is a prerequisite to making informed decisions and protects against being easily manipulated.

Key Questions

Educating the whole and career readiness Identifying competencies
Working out how competencies are met
Progression: LAS requirements Gen Ed
Being able to answer the question: why?

Unaddressed Questions

How many credits? Which courses? How much double dipping – major / gen ed?

. . .

LAS Graduation Requirements – Competencies Framework – April 30, 2021

Competency	Class	Purpose	Credit Hours
I. Introduction			
i. introduction	- introduction to	- course tdeachstudentshow the various	3
	Fairmount College	disciplines in the college arrive at truth	3
